UNITED STATES
DEPARTMENT OF THE INTERIOR
BUREAU OF RECLAMATION
DENVER OFFICE
DENVER, COLORADO

In accordance with Reclamation Instructions 352.1.3, Supplement 2, INACTIVE NAMES OF RECLAMATION PROJECTS AND MAJOR STRUCTURES, has been revised and updated.

The format for this complete Supplement reissue includes an alphabetical index of all names with identification as to their regional location, followed by a section of the names and related descriptive information by regions.

This office acknowledges the possibility that there may be omissions or minor inconsistencies. Discrepancies which may be discovered through your use of the list should be brought to the attention of the Manager, Planning Services Staff, Code D-5170, for correction in order that the errors will not be perpetuated.

Name actions or changes which have taken place since February 1991 are not reflected in this ACTIVE NAMES Supplement.

The INACTIVE NAMES list, Supplement 1, is issued separately.

APPROVED:

Robert K. Lanke
Manager, Planning Services Staff

6/13/91
Date

When Congress authorized the reclamation of arid and semiarid lands in the West with the Reclamation Act of 1902, the Secretary of the Interior established the Reclamation Service within the United States Geological Survey. In 1907, the Reclamation Service became an independent agency within the Department of the Interior. By action of the Secretary of the Interior in 1923, the Reclamation Service became the Bureau of Reclamation. In November 1979, the name was changed to the Water and Power Resources Service by Secretarial Order, and in May 1981, the Secretary of the Interior changed the agency's name back to the Bureau of Reclamation.

ENTRY CRITERIA

1. Names of projects, subdivisions, and major structures in the Inactive Names List are not underlined regardless of stage of development.

2. Names of projects and major structures shown in the Inactive Names List fall within the following criteria:

   a. The name has been changed, but with no change in physical concept.

   b. Projects or subdivisions of projects superseded by new names due to change in extent, plan, or purpose.

   c. Projects, subdivisions of projects or features which have been investigated by Reclamation and indefinitely deferred or declared infeasible by formal report, letter, or administrative decision.

3. A transfer of an Inactive Name to the Active Names List can be accomplished at any time, provided a change of circumstances warrants such a transfer and no direct name duplication would exist.

4. Authority, responsibilities, and procedures for maintenance of the Inactive Names List are given in RI 352.1.

5. This listing supersedes any previous Bureau of Reclamation Project and Major Structure Inactive Names List.
